

Elevator Solutions in a Touchless World

***Touchless Building Entry
& Elevator Operations***

***Know Who's in Your
Building at all Times***

***Verify Employee
Temperature & Masks***

Touchless Elevator

CSI can provide touchless readers that get employees from the building entrance to the tenant's front door without touching a door handle or an elevator button. We can provide a frictionless environment with one hundred percent verification of an employee is verified by building security upon entry.

Temperature Monitoring & Mask Detection

As the COVID Crisis has evolved temperature monitoring of occupants and mask detection have become a critical task for a building staff that is already over tasked.

CSI provides solution that automatically scan for both temperature and mask detection, while providing the tenant / visitor and staff feedback on a valid scan.

Occupancy Enforcement

Using the latest video analytic technology, CSI can provide real time occupancy counting and overcrowding detection within the lobby and the elevators. Our solutions can provide alerts to staff upon overcrowding and send alerts to the proper personnel when maximum capacities are met. Elevators may also be signaled to bypass certain floors when overcrowding is detected.

***Employees and visitors
can use a no touchless
'button' to get from the
lobby to their destination
minimizing the spread
of germs to themselves
and others.***
